Economic whips, political necessities: UCD and the unfolding of the 2008–2009 global financial crisis

Conclusion: delayed transition

After being recovered and expanded by Justin Rosenberg almost two decades ago, Trotsky's concept of Uneven and Combined Development (UCD) has inspired many articles, dissertations and books, becoming the core of one of the most exciting contemporary approaches within the cacophonous discipline of International Relations. Nevertheless, the contribution of the emerging UCD literature remains largely unbalanced. Most of it revolves around the classical sociological problems of capitalist transition and state formation. As such, the UCD scholarship disproportionately belongs to the field of international historical sociology, favouring expansive explanations and broad historical questions. With few exceptions, contemporary UCD has had little to say in shorter-term, policy-oriented, International Political Economy (IPE) debates. To fruitfully inform IPE analysis, UCD must expand and refine its highly abstract conceptual toolkit. In this article, I take stock of the existing literature and offer an original contribution to the UCD-IPE framework. Specifically, I unpack the general notion of the 'whip of external necessity' into more granular and operational concepts, setting the foundations for a UCD-inspired exchange-rate, monetary and fiscal policy analysis. Finally, the potential of an expanded UCD-IPE framework is illustrated through considerations on the uneven and combined effects of the 2008 financial crisis.

In two tweets just before 8 a. m. on a Monday morning, President Donald Trump abruptly announced the imposition of tariffs on Brazilian and Argentinian steel and aluminum.

Of economic whips and political necessities: a contribution to the international political economy of uneven and combined development

Abstract *After being recovered and expanded by Justin Rosenberg almost two decades ago, Trotsky's concept of Uneven and Combined Development (UCD) has inspired many articles, dissertations and books, becoming the core of one of the most exciting contemporary approaches within the cacophonous discipline of International Relations. Nevertheless, the contribution of the emerging UCD literature remains largely unbalanced. Most of it revolves around the classical sociological problems of capitalist transition and state formation. As such, the UCD scholarship disproportionately belongs to the field of international historical sociology, favouring expansive explanations and broad historical questions. With few exceptions, contemporary UCD has had little to say in shorter-term, policy-oriented, International Political Economy (IPE) debates. To fruitfully inform IPE analysis, UCD must expand and refine its highly abstract conceptual toolkit. In this article, I take stock of the existing literature and offer an original contribution to the UCD-IPE framework. Specifically, I unpack the general notion of the 'whip of external necessity' into more granular and operational concepts, setting the foundations for a UCD-inspired exchange-rate, monetary and fiscal policy analysis. Finally, the potential of an expanded UCD-IPE framework is illustrated through considerations on the uneven and combined effects of the 2008 financial crisis.*

Riassunto: The article profiles Thierry Henri Philippe Baudet, leader of the Freedom Party (FPV) which he founded as a think tank in 2015. It examines his strong support for Dutch national culture and concern that Muslim immigrants and refugees could dilute it. The article goes on to look at Baudet's role in Europe's alt-right movement and increasing support for his FPV party.

THE NEW FACE OF THE EUROPEAN ALT-RIGHT?

On the first day of June in 2017, dutch national television crews were at the ready when a moving truck pulled into the stately cobblestone courtyard of the parliament in The Hague. The truck's load, a black grand piano, had been the subject of conversation for months. As the movers wheeled the blanket-covered instrument into the parliament building under the watchful eyes of its 34-year-old owner, it was clear they were ushering in a fresh chapter in the history of Dutch right-wing populism. The movement to save Dutch national culture has a new leader—and he plays Brahms.

Three months earlier, the Netherlands had held parliamentary elections. To the relief of many on the left and right alike, the anti-immigrant Freedom Party (PVV), led by the peroxide-blood populist Geert Wilders, failed to win the victory that some earlier polls had predicted. Still, it earned a record 14 million votes, coming in second with 20 of the 150 available seats, behind the neoliberal People's Party for Freedom and Democracy (VVD) of Prime Minister Mark Rutte, but far ahead of the social-democratic Labor Party, which was governing with the VVD and saw its support decimated. As the crestfallen social democrats resigned themselves to a stint in the opposition, the other major parties agreed that Wilders, too, should be barred from joining the government. His radical anti-islam positions—he wants to shutter all mosques and ban the Quran—placed him too far outside of the mainstream. And his obstructionist attitude did not jibe with the Dutch political culture of consensus, coalition, and compromise. Given his behavior, some commentators openly wondered whether Wilders aspired to govern at all. In the wake of the election, disillusion began to set in among the PVV's disgruntled constituency.

The man who stood to benefit most from Wilders's deflation was Thierry Baudet, the freshman deputy who excused himself from a parliamentary debate last June to personally supervise the arrival of his piano. Shortly after the election, he had requested official permission to move the instrument from his Amsterdam apartment to his new office in The Hague, making good on a flippant campaign promise. The piano was a necessary part of his "entourage," he argued, and would allow him to decompress in between sessions with some Schubert or Brahms. After three months, Baudet got his wish.

Thierry Henri Philippe Baudet, who just turned 35, is an intellectual who claims to loathe politics, modern art, and popular culture. He is also the rising star of the Dutch alt-right. His flamboyant image and rapid ascent resemble that of Pim Fortuyn, the dour occultist pioneer who railed against Muslim immigrants and was killed by an environmental activist in May 2002 in the country's first political assassination since the 17th century. Two years later, a
